Experience

Freelancer (Contract)

Via VIVA Innovation —
Client: Samsung Kangbuk Hospital

PM & Product Designer

Oct 2025 – Nov 2025

- Led the launch of a mobile health checkup booking service serving approximately 250K annual users
- Acted in dual roles as PM and Product Designer, collaborating with Samsung SDS and hospital stakeholders
- Owned service planning, UX design, wireframing, and full development handoff

VIVA Innovation

Healthcare SaaS Platform
(B2B, B2C, Multi-platform)
Seoul, South Korea

Product Design Lead

Mar 2022– May 2025

- Scaled a multi-platform healthcare ecosystem (B2C mobile + B2B SaaS) **from MVP to Series B (₩19.8B)**.
- Increased booking conversion **by 39% MoM** following a mobile app main redesign.
- Designed enterprise CMS, hospital CRM, and back-office systems including a Capacity management system that reduced cancellation rates by 3× and cut operational workload.
- Launched Kindco as a web platform, extending the service beyond mobile
- Led product design for Kindoc AI, a generative AI healthcare chatbot.
- Led end-to-end design for a Patient Management System (PMS) for post-treatment care monitoring.
- Mentored a team of 2 junior designers and 1 part-time designer.

UIUX Designer

Nov 2018 – Feb 2022

- Founding team member · Equity holder
- Led end-to-end UX/UI design and product definition for Doctrue, a telemedicine tablet app, without a dedicated PM — shipped to production before being folded into the HomeDoctor platform
- Designed the HomeDoctor mobile app/admin, a healthcare management app for seniors living alone
- Built and documented a B2B2C design system, reducing development handoff time by 3×
- Participated in mobile app refactoring for Kindoc(착한의사), re-establishing the mobile design system foundation
- Established Figma-based collaboration workflows, standardizing design handoff across the team.

Enterprise Partnerships

- **Samsung Kangbuk Hospital** — Designed an enterprise-scale checkup reservation system (Admin & Mobile) supporting 250K users annually.
- **LG Electronics** — Designed a bio-data integrated mobile health platform connected to Bluetooth devices.

Education

Ewha Womans University College of Fine Arts

Mar 2011 – Aug 2016

BFA in Fiber Arts

Korea Animation Highschool

Mar 2008– Feb 2011

Major in Animation

[Student Animation Project\[Video Link\]](#)
